The Akka # 280 is the highest customer rated model from our barrel line, available in various configurations according to the customer's individual requirements. The barrel has 2.8 m length and can be used comfortably by 4 persons. The sauna is designed for open-air installation and does not require a building permit. It is quite versatile and can serve as furnishing of any garden or recreational plot, but will also look great on your terrace, under a roof or a gazebo.
